UNCLE WIGGILY AND THE TOY WAGON.

BY HOWARD R. GARIS.

(Copyright, 1918, by the McClure Newspaper Syndicate.)

On the night of the 10th of the month, a bungalow in the town of Wiggily, the most beautiful house ever built, was being decorated for Christmas. The house was a small, cozy affair, with a red roof and white walls. The windows were adorned with red and white striped awnings. The front door was a small, arched doorway with a red door. The house was surrounded by a small garden with a few flowers and a small path leading to the door.

Uncle Wiggily was sitting on the porch, looking at the decorations. He was a small, round, old man with a white beard and a red hat. He was wearing a blue coat and a red tie. He was looking at the decorations with a smile on his face. He was looking at the decorations with a smile on his face.

He was looking at the decorations with a smile on his face. He was looking at the decorations with a smile on his face. He was looking at the decorations with a smile on his face. He was looking at the decorations with a smile on his face.

Turk and Teuton

Amosador Morgenthau's story of Great War Fights

BY HENRY MORGENTHAU.

(Continued from Previous Issue.)

One of the best informed men in Turkey was Paul Weiss, the correspondent of the Frankfurter Zeitung. He had spent three years in Constantinople and had the most intimate personal knowledge of Turkish affairs, and he was the confident and adviser of the German embassy. His duties there were actually semi-diplomatic.

Weiss had really been one of the most successful agents in the German penetration of Turkey. It was common in the Turkish empire, the best way to approach a thing and a price. Several talks with Weiss about Bulgaria during those critical August and September days. He said many times that it was not at all certain that she would join her forces with Germany.

The situation had changed over night. But Weiss, the correspondent of the German embassy at Constantinople, had gone to Sofia, and as a result of his talks with the Bulgarian government, he had returned with a message that would make Bulgaria Germany's ally.

Germany, said Weiss, had won over Bulgaria by doing something which the entente had not been able and willing to do. It had secured for the Bulgarian possession of a piece of coveted territory. Serbia had refused to give up Macedonia, Turkey, on the other hand, had not surrendered a piece of the Ottoman empire. The most important question, it is true, was apparently insignificant, yet it had great strategic importance. It was the Maritsa river, a few miles north of Sofia, behind which the Bulgarians had been driven to the west again, creating a block of territory with an area of 10,000 square miles.

including the important cities of Dimitritsa, Karsa-Agatch and half of Adrianople. What makes this land so important is that it contains about fifty miles of the railroad runs from Belgrade to Sofia. All the Balkan communications with the Mediterranean. Naturally Bulgaria yearned for this piece of territory.

Now, however, it was in German hands. It was a piece of land which the Bulgarians had fought for. It was a piece of land which the Bulgarians had fought for. It was a piece of land which the Bulgarians had fought for.

It was a piece of land which the Bulgarians had fought for. It was a piece of land which the Bulgarians had fought for. It was a piece of land which the Bulgarians had fought for.

A BIRD IN THE HAND

(Special Information Service, U. S. Department of Agriculture.)

FEED FOR WINTER LAYERS

First year's egg yield and feeding consumption of one of the hens in government feeding tests.

The hen shown in the illustration produced nearly 12 dozen eggs on 24 pounds of mixed feed, equal parts of corn meal, middlings and feed or fish scrap) and 48 pounds of grain equal parts cracked corn, wheat and oats. To conserve wheat and still have an economical egg-yielding ration, poultry specialists recommend a grain ration of two parts cracked corn and one part oats.

Poultry owners who wish to obtain a satisfactory production of eggs during the winter should plan to give their birds plenty of feed. Just what kind of feed that can be supplied most economically and which will keep the birds in the best of health is a problem. The poultry division of the United States department of agriculture has for some years been conducting tests on substitute feeds with laying hens.

The poultry specialists have found, for example, that by feeding a wheat ration there is a considerable saving in the cost of feed and the hens will produce as many eggs as when wheat is included.

Thirty Leghorn pullets to which this wheat ration was fed for 14 weeks produced an average of 147.3 eggs a hen for the period. This compares favorably with the average of 140 eggs a hen for the same period when other rations containing wheat and, therefore, more expensive. During the 14 weeks of the second year the hens produced an average of 147.3 eggs a hen for the period.

The value per dozen of the eggs produced by the Leghorns was from 1 to 2 cents less each year than the average weight of the eggs of a pen of Leghorns during the first laying year. An examination in May, 1915, of 500 eggs from three Leghorn pens showed that 21 per cent weighed more than 2 ounces each, or 1.50 pounds to the dozen.

HOROSCOPE

THURSDAY, DECEMBER 12, 1918. (Copyright, 1918, by the McClure Newspaper Syndicate.)

This is not an important day, according to astrology. Early in the morning Jupiter rises strongly for good and maintains his friendly power to a certain extent during the day. The stars give best promise for business transactions begun during this configuration.

Large enterprises foretold for the new year, have the most encouraging prognostications, and those that succeed best will not be private ventures, but intended for the public good. In the new era wealth will be more and more regarded as merely in the custody and not the possession of private individuals, the seers declare, but they warn that the progress must be made by co-operation and not by intimidation.

Those who read the stars foretell the continuing of the progress, but it will be political and national, they prophesy, and they foresee misunderstandings and misjudgments in which leaders of public opinion will away the people.

Education comes under the friendly guidance of the stars and the greatest achievements yet recorded, but it will be practical in its trend. Many changes in universities as well as public schools are prognosticated.

Teachers continue under the friendly guidance of the stars and the greatest achievements yet recorded, but it will be practical in its trend. Many changes in universities as well as public schools are prognosticated.

The birth of a supreme genius, who will become the greatest leader of the future, is predicted for 1919. Increase in the number of weddings will be great during the winter months.

Food will be the great concern of the world during the next few months, if the stars are read aright. Again community kitchens and other methods of conserving and preparing meals are foretold by the stars.

Persons whose birthday it is have the augury of a prosperous year. Business and money will increase. Children born on this day are likely to be exceedingly original in thought, industrious and successful.

REAL ESTATE MAN

COULD HARDLY WALK

Feet Were So Sore From Rheumatism He Could Hardly Put on His Shoes.

"I was so crippled up with rheumatism that I could hardly walk, when I began using Tanlac," said J. R. Owens, a well-known real estate operator, residing at 81 Rivas street, San Antonio, Tex., recently.

"About a year ago," he continued, "I began to suffer from rheumatism that kept getting worse in spite of all that I could do. My limbs would ache so I could hardly bear it, and my joints would get so stiff that at times it was all I could do to drag myself around. When I got out of bed in the morning my hands and feet would be so stiff and hurt so bad I could hardly put on my shoes. I suffered agonies night and day, and though I tried about everything in the way of treatments that I could hear of, nothing did me any good. One day I read in the papers about a man who had been relieved of a case of rheumatism like mine through the use of Tanlac, and that encouraged me to give it a trial. I'm certainly glad I did, for it has done me more good than anything else I have ever taken. By the time I had used up my first bottle, my stiffness had about left my joints, and my limbs had stopped aching. My improvement since has been so wonderful that I am confident a few more bottles of Tanlac will make me as well as I ever was."

Tanlac is sold in Memphis exclusively by Weiss Pharmacy (successor to Jacob's Pharmacy), Main street and Union avenue, and Warnock Drug Co., in Gayoso Hotel block.
